

CREATING A CULTURE OF QUALITY:

Developing the Infrastructure to Meet
Quality Improvement Requirements in Renal Care

Wednesday, March 16, 2011 / Linthicum, Maryland

MEET OUR KEYNOTE,
JAMES BAGIAN, MD, PE

NASA ASTRONAUT TURNED
PATIENT SAFETY EXPERT

YOU'LL BE GLAD YOU GOT UP EARLY!

“Name a high-stakes industry, and odds are Bagian has been involved in trying to make it safer.

He is, among other things,
an engineer,
an anesthesiologist,
a NASA astronaut (he was originally scheduled to be on the fatal *Challenger* mission),
a private pilot,
an Air Force-qualified freefall parachutist,
and a mountain rescue instructor.

Dr. Bagian is currently the Director of the Center for Health Engineering and Patient Safety and is a Professor in the College of Engineering and the Medical School at the University of Michigan.

**If the biggest obstacles to improving medical safety are cultural,
how do you go about changing the culture?”**

To find out... join us at 7:30 AM on March 16th. Register for the conference at

Creating a Culture of
Quality

A renal community collaboration presented by the Forum of ESRD Networks in partnership
with DaVita, DCI, Fresenius, Liberty Dialysis, and the Renal Physicians Association.
This activity is supported by an educational donation provided by Amgen.
